

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

# BACK STATION - NATIVE DOG CREEK

LANDFORM	River, Creeklines & Low country		Gently undulating lower & mid slopes with short creek lines		Upper slopes to high rocky hills & ridges
