

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

BERRIQUIN (SOUTHERN)

LANDFORM	Creeklines and Secondary Floodplains		Plains		Lunettes and Sand Ridges	
VEGETATION TYPE	Black Box Woodland.		Grey Box Woodland.		Callitris Mixed Woodland (Prior Streams / Lunettes).	
GEOLOGY & SOILS	Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.		Open grassy woodland with Grey Box and Bull Oak. Alluvial, variety of soils – clays, loams, sands and silts.		Low woodland to woodland of prior streams, source bordering dunes or lunettes dominated by White Cypress Pine and shrubs scattered over a grassy understorey. Aeolian: well drained sandy-loams and loams.	
LOCATION EXAMPLE	Tholobin State Forest, Mairjimmy State Forest, Maddison Square Travelling Stock Reserve, Crossleys Travelling Stock Reserve.		Tholobin State Forest, Marjimmy State Forest, Green Swamp Travelling Stock Reserve, Coree Rd.		Tholobin State Forest, Avalon Rd.
