

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## BOOLIGAL (SOUTHERN)

<b>LANDFORM</b>	Reed Bed	Rivers, Floodplains and Levees	Shallow Depressions
<b>VEGETATION TYPE</b>	Reed Bed	Riverine Forest.	Lignum – Goosefoot / Canegrass Swamp.
<b>GEOLOGY &amp; SOILS</b>	Deep wetland dominated by Bulrushes. Alluvial, heavy grey clays.	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.	Open scrub to tussock grassland in depressions and low lying areas subject to intermittent flooding. Alluvial, heavy grey, cracking clays, sometimes slightly saline.
<b>LOCATION EXAMPLE</b>	Great Cumbung Swamp, Lake Tala, Lake Bunumburt.	Goonawarra Nature Reserve, Oxley State Forest, McFarlands State Forest, Quandong State Forest.	Boxyards Rd, approximately 14km west of Booligal, Goonawarra Nature Reserve.
