

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

BRIBBAREE - DUCK HOLE CREEK

LANDFORM	Drainage Lines		Slopes and Crests		Plains	
VEGETATION TYPE	River Red Gum herbaceous-grassy very tall open forest & Blakely's Red Gum – Yellow Box grassy tall woodland		White Box grassy woodland in the upper slopes, Blakely's Red Gum – Yellow Box grassy tall woodland & Blakely's Red Gum – White Box – Yellow Box – Black Cypress Pine box grass/shrub woodland on undulating hills. Some crests exclusively White Box		Western Grey Box tall grassy woodland
