

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

BROOKONG

LANDFORM	Plains	Low rises		Higher rocky outcrop	
VEGETATION TYPE	Grey box woodland			Blakely's Red Gum / Yellow and Grey box woodland	
GEOLOGY & SOILS	Unconsolidated riverine deposits of clay, sand, silt and gravel. Grey and brown clays and red-brown earths.	Residual and colluvial deposits derived from underlying meta-sediments. Grey and brown clays and red-brown earths.		Conglomerate, sandstone, quartzite, reddish shale and siltstone. Red and yellow podzolic (duplex) and lithosols (earthy loams).	
LOCATION EXAMPLE	Urana Road	Brookong State Forest and Lockhart		Galore Hill
