

# BUCKARGINGAH

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

LANDFORM	Flats and lower slopes				Hills				
VEGETATION TYPE	Grey and Yellow Box woodland/Grey Box and White Cypress Pine woodland				White Box woodland and Red Stringybark dry forest (shaley hills)				
GEOLOGY & SOILS	Mainly alluvial deposits of sand, silt, clay and gravel. Red-brown earths.				Granite, gneissic granite and gneiss. Quartzite, slate, phyllite, greywacke, hornfels and schist. Red and yellow podzolic (duplex) soils.				
LOCATION EXAMPLE	Olympic Highway				Cookarbine Hill
