

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## CADELL

LANDFORM	Creeklines and Secondary Floodplains		Plains		Level to Depressed Plains	
VEGETATION TYPE	Black Box Woodland.		Grey Box Woodland.		Boree Woodland.	
GEOLOGY & SOILS	Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.		Open grassy woodland with Grey Box and Bull Oak. Alluvial, variety of soils – clays, loams, sands and silts.		Low woodland to low open woodland dominated by Boree with a mainly herbaceous understorey. Grey and brown clays, or sometimes on red-brown earths.	
LOCATION EXAMPLE	Perricoota State Forest, Whymoul State Forest.		Lower Thule Rd, 5 Mile Travelling Stock Reserve, 10 Mile Travelling Stock Reserve.		Formerly in north east part of Cadell sub-region, no intact examples remain, only known examples are in the vicinity of Walliston Rd south of Wilson Lane.
