

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## CADELL (NORTH-EASTERN)

<b>LANDFORM</b>	Level to Depressed Plains	Plains	Gilgai Plains
<b>VEGETATION TYPE</b>	Boree Woodland.	Native Grassland.	Gilgai Wetland.
<b>GEOLOGY &amp; SOILS</b>	Low woodland to low open woodland dominated by Boree with a mainly herbaceous understorey. Grey and brown clays, or sometimes on red-brown earths.	Treeless grassland on plains with seasonally variable composition of herbs, grasses and low shrubs. Alluvial, mainly red-brown clays and grey-brown cracking clays.	Treeless grassland on seasonally wet plains with mainly herbaceous understorey. Alluvial, heavy grey, cracking clays.
<b>LOCATION EXAMPLE</b>	Formerly in north east part of Cadell sub-region, no intact examples remain, only known examples are in the vicinity of Walliston Rd south of Wilson Lane.	Formerly interspersed with Boree Woodland, mainly in north east part of Cadell sub-region, Cobb Highway Travelling Stock Reserve.	No intact examples, formerly interspersed with Native Grassland and Boree Woodland in north east part of Cadell sub-region.
