

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

CADELL

LANDFORM	Rivers, Floodplains and Levees		Creeklines and Secondary Floodplains		Lunettes and Sand Ridges	
VEGETATION TYPE	Riverine Forest.		Black Box Woodland.		Callitris Mixed Woodland (Prior Streams / Lunettes).	
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.		Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.		Low woodland to woodland of prior streams, source bordering dunes or lunettes dominated by White Cypress Pine and shrubs scattered over a grassy understorey. Aeolian, well-drained sandy-loams and loams.	
LOCATION EXAMPLE	Koondrook State Forest, Perricoota State Forest, Lower Thule Rd, Campbells Island State Forest.		Perricoota State Forest, Whymoul State Forest.		Koondrook, Lower Thule Rd.
