

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

CARABOST

LANDFORM	High hills		Lower rolling hills		Shaley ridge	
VEGETATION TYPE	Dry sclerophyll forest – mixed species		Yellow Box and Blakely's Red Gum dry forest		Red Stringybark/Scribbly Gum or Snap Gum forest	
GEOLOGY & SOILS	Quartzite, slate, phyllite, greywacke, hornfels and schist					
LOCATION EXAMPLE	SW of catchment: Carabost State Forest		(no intact example available)		Eastern edge of catchment
