

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

CARRATHOOL (EASTERN)

LANDFORM	Rivers, Floodplains and Levees	Plains	Prior Streams, Lunettes and Sand Ridges			
VEGETATION TYPE	Riverine Forest.	Grey Box Woodland.	Callitris Mixed Woodland (Prior Streams / Lunettes).			
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.	Open grassy woodland with Grey Box and Bull Oak. Alluvial, variety of soils – clays, loams, sands and silts.	Low woodland to woodland of prior streams, source bordering dunes or lunettes dominated by White Cypress Pine and shrubs scattered over a grassy understorey. Alluvial or aeolian, well-drained sandy-loams and loams.			
LOCATION EXAMPLE	Benerambah State Forest, Cuba State Forest.	Murrami Track south-east of Griffith, Narrandera area.	No intact examples remain, disturbed example of a prior stream on Wrights Lane 5 km north of Carrathool.
