

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

# COCOPARRA

| LANDFORM                     | Plains   |  | Lower Slopes and Hills   |  | Rocky Outcrops   |  |
|------------------------------|--|--|--|--|--|--|
| VEGETATION TYPE              | Grey Box Woodland.   |  | Box – Callitris Woodland.  |  | Rocky Outcrop Woodland.  |  |
| GEOLOGY & SOILS              | Open grassy woodland with Grey Box and Bull Oak. Alluvial, variety of soils – clays, loams, sands and silts.   |  | Woodland to open forest on low hills and slopes with Bimble Box and other eucalypts and a predominantly herbaceous understorey. Alluvial: loamy red earths.  |  | Low open woodland with exposed rock and sparse groundcover. Sandstone – conglomerate, sands and loams with a gravelly surface.   |  |
| LOCATION EXAMPLE             | No intact examples known.  |  | Erigolia Rd, Lake Cargellico Rd 6 km north of Rankin Springs.  |  | Summit of Mt Bingar in Cocoparra National Park, Sims Gap, Lachlan Range and McPhersons Range.  |  |
