

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

COCOPARRA (NORTHERN)

LANDFORM	Rivers, Floodplains and Levees		Creeklines and Secondary Floodplains		Valleys and Floodplains	
VEGETATION TYPE	Riverine Forest.		Black Box Woodland.		Bimble Box Woodland.	
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy, grey, brown or red clay soils.		Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.		Open Bimble Box woodland on floodplains and wide valleys with grassy understorey. Alluvial, red loams.	
LOCATION EXAMPLE	Lachlan River.		Lachlan Valley west of Lake Cargellico.		Euabolong – Hillston Rd, approximately 7.1km west of the Kidman Way, Naradhan – Rankin Springs Rd.
