

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## DEADMANS - BUNGOWANNAH - LONG FLAT

| LANDFORM         | Flats/plain  |   | Lower slopes  |  | Hills   |   |
|------------------|--|---|---|--|---|---|
| VEGETATION TYPE  | River Red Gum woodland   |   | Box woodland – White Box on rises/upper slopes. Yellow Box and Blakely's Red Gum woodland along drainage lines.   |  | White Box woodland and Red Gum woodland   |   |
| GEOLOGY & SOILS  | Floodplain sediments – clay, silt, sand and gravel. Alluviol loams and clays.  |   | Residual and colluvial deposits from underlying meta- sediments. Red and yellow earths.   |  | Residual and colluvial deposits from underlying meta-sediments. Shallow red and yellow loams.   |   |
| LOCATION EXAMPLE | Murray River   |   | Bungowannah vicinity  |  | One Tree Hill   |   |
