

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## HATFIELD (SOUTHERN)

LANDFORM	Rivers, Floodplains and Levees		Creeklines and Secondary Floodplains		Shallow Depressions	
VEGETATION TYPE	Riverine Forest.		Black Box Woodland.		Lignum – Goosefoot / Canegrass Swamp.	
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.		Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.		Open scrub to tussock grassland in depressions and low lying areas subject to intermittent flooding. Alluvial, heavy grey, cracking clays, sometimes slightly saline.	
LOCATION EXAMPLE	Redbank Weir.		Redbank Weir Road, Box Creek.		Tyson Lake, Box Creek.
