

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## HILLSTON (NORTH-WESTERN)

LANDFORM	Level to Depressed Plains		Undulating Plains, Low Rises and Levees		Sandplains and Low Rises	
VEGETATION TYPE	Bladder Saltbush Chenopod Shrubland.		Black / Pearl Bluebush Chenopod Shrubland.		Belah – Rosewood Woodland.	
GEOLOGY & SOILS	Low shrubland to low open shrubland dominated by Bladder Saltbush and other chenopods. Alluvial, grey, self-mulching and cracking clays to red duplex soils with grey and brown clays, sometimes saline.		Low shrubland to low open shrubland dominated by Pearl Bluebush and/or Black Bluebush. Aeolian, deep calcareous sands and loams, red-brown duplex sandy soils with clay subsoil.		Low woodland to low open woodland dominated by Belah and Rosewood, with and open shrubby understorey on sandplains and lunettes. Alluvial or aeolian, red or brown calcareous loams or loamy sands.	
LOCATION EXAMPLE	Cobb Highway in vicinity of Toms Tank, Willandra National Park.		Cobb Highway south of Mossgiel.		Crowsnest Travelling Stock Reserve, Mossgiel Trunk Rd east of Mossgiel.
