

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

HILLSTON

LANDFORM	Rivers, Floodplains and Levees	Creeklines and Secondary Floodplains	Shallow Depressions			
VEGETATION TYPE	Riverine Forest.	Black Box Woodland.	Lignum – Goosefoot / Canegrass Swamp.			
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.	Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.	Open scrub to tussock grassland in depressions and low lying areas subject to intermittent flooding. Alluvial, heavy grey, cracking clays, sometimes slightly saline.			
LOCATION EXAMPLE	Lachlan River at end of Cemetery Track, 7km east of Booligal, Moon Moon State Forest.	Willandra Creek in Willandra National Park, Box Creek crossing on Merungle Rd.	Cobb Highway at Moolbong Creek crossing, Mossgiel Trunk Rd at Umbrella Creek and Once-A-While Creek crossings.
