

LIVINGSTONE

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

LANDFORM	Lower slopes		Upper slopes	
VEGETATION TYPE	Blakely's Red Gum and Red Box woodland		Tumbledown Gum and Red Stringybark woodland	
GEOLOGY & SOILS	Riverine deposits of sand, silt, clay and gravel. Yellow solonetzic (mottled-yellow duplex)		Quartzite, slate, phyllite, greywacke, hornfels and schist. Also granite. Red podzolic (duplex) soils.
