

# LOWER SANDY

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

LANDFORM	Higher slopes		Flats		Low to mid slopes	
VEGETATION TYPE	White Box woodland		Grey Box and Yellow Box woodland		Yellow Box/Grey Box/White Box woodland	
GEOLOGY & SOILS	Quartzite, slate, phyllite, greywacke, hornfels and schist. Lithosols (earthy loams) and red podzolic (duplex) soils.		Alluvium – sand, silt, clay and gravel. Alluvial soils and red podzolic (duplex) soils.		Alluvium – sand, silt, clay and gravel. Non-calcic brown soils, red earths and red-brown earths	
LOCATION EXAMPLE	Pomingalarna Reserve		Uranquinty/Yarragundry area		North of Uranquinty	
TREES > 8 m	<i>Allocasuarina verticillata</i> <i>Brachychiton populneus</i> <i>Callitris glaucophylla</i> <i>Eucalyptus albens</i> <i>E. blakelyi</i> <i>E. melliodora</i> <i>E. microcarpa</i> <i>Exocarpos cupressiformis</i>	Drooping Sheoak Kurrajong White Cypress Pine White Box Blakely's Red Gum Yellow Box Grey Box Native Cherry	<i>Eucalyptus blakelyi</i> <i>E. camaldulensis</i> <i>E. melliodora</i> <i>E. microcarpa</i>	Blakely's Red Gum River Red Gum Yellow Box Grey Box	<i>Acacia leucoclada</i> <i>Brachychiton populneus</i> <i>Callitris glaucophylla</i> <i>Eucalyptus albens</i> <i>E. melliodora</i> <i>E. microcarpa</i>	Northern Silver Wattle Kurrajong White Cypress Pine White Box Yellow Box Grey Box
