

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

LOWER TARCUTTA

LANDFORM	Mid to upper slopes		Creekline, flats and lower slopes		Rocky hills and ridgelines	
VEGETATION TYPE	Ironbark and Box woodland		Yellow Box/Blakely's Red Gum and Red Box woodland		Red Stringybark woodland
