

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

MEADOW CREEK

LANDFORM	Creeks, Rivers and Low Country		Mid Slopes		Hillslopes and Ridges	
VEGETATION TYPE	River Red Gum Woodland		White Box – Blakely's Red Gum – Long-leaf Box – Nortons Box – Red Stringybark grass-shrub woodland		Black Cypress Pine – Red Stringybark, Mugga/Red Ironbark & Red Box shrub/grass open forest	
GEOLOGY & SOILS	Riverine deposits of clay, silt, sand and gravel		Shallow clay or loamy clay soils derived from fine grained sedimentary, metamorphic or igneous substrates		Occurs on grey to red to yellow podzolic loamy sand soils derived from granite and some metamorphic rocks & Occurs on shallow clayey soils derived from mainly metamorphic substrates such as phyllite or arkose	
LOCATION EXAMPLE	(no intact example available)		(no intact example available)		Wyangala Dam
