

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

# MERRIWAGGA

LANDFORM	Sandplains and Low Rises		Sandplains and Minor Dunefields		Sandplains, Swales and Dune Crests	
VEGETATION TYPE	Belah – Rosewood Woodland.		Callitris Mixed Woodland (Sandplains and minor dunefields).		Mallee Woodland.	
GEOLOGY & SOILS	Low woodland to low open woodland dominated by Belah and Rosewood, with and open shrubby understorey on sandplains and lunettes. Alluvial or aeolian, red or brown calcareous loams or loamy sands.		Woodlands to tall woodland dominated by White Cypress Pine with emergent eucalypts and Belah on sandplains and minor dunefields. Alluvial, red loams.		Tall shrubland to low woodland dominated by multi-stemmed mallee eucalypts. Aeolian, sandy red loams.	
LOCATION EXAMPLE	McKinley Rd, Gunbar, Kidman Way between Merriwagga and Goolgowi.		Kidman Way roadside south of the Lachlan River, Hillston – Merriwagga Rd, Monia Gap Rd approx. 8 km east of Hillston.		Pulletop Nature Reserve, western end of Andersons Rd, Loughnan Nature Reserve south of Hillston.
