

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

MURRAKOOL (NORTHERN)

LANDFORM	Shallow Wetland	Lunettes and Sand Ridges	Level to Depressed Plains
VEGETATION TYPE	Shallow Wetland.	Callitris Mixed Woodland (Prior Streams / Lunettes).	Bladder Saltbush Chenopod Shrubland.
GEOLOGY & SOILS	Seasonal or intermittent wetland, meadow, marsh, lake or lagoon with fringing River Red Gum and/or Grey Box. Alluvial, heavy grey clays.	Low woodland to woodland of prior streams, source bordering dunes or lunettes dominated by White Cypress Pine and shrubs scattered over a grassy understorey. Aeolian: well drained sandy-loams and loams.	Low shrubland to low open shrubland dominated by Bladder Saltbush and other chenopods. Alluvial, grey, self-mulching and cracking clays to red duplex soils with grey and brown clays, sometimes saline.
LOCATION EXAMPLE	Lake Genoe, Lake Poon Boon, wetlands along the Niemur River.	Barham – Moulamein Rd between Colenso Park Rd and Wakool River, eastern part of Coonamit Travelling Stock Reserve.	No intact examples remain south of Billabong Creek, formerly occurred between Swan Hill and Kyalite.
