

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

O'BRIENS SOUTH - MCLEODS

LANDFORM	Creeklines and flats		Mid slopes		Upper slopes and rocky ridgelines			
VEGETATION TYPE	Blakely's Red Gum and Yellow Box woodland				Mixed woodland			
GEOLOGY & SOILS	Alluvium. Yellow solonetzic (mottled-yellow duplex).		Granite. Quartzite, slate, phyllite, greywacke, hornfels and schist. Red podzolic (duplex) soils.		Quartzite, slate, phyllite, greywacke, hornfels and schist. Red podzolic (duplex) soils and lithosols (siliceous loams).			
LOCATION EXAMPLE	McClouds and O'Briens Creeks		O'Briens Creek Road and Maxwell		Livingstone State Forest
