

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

PADDY'S RIVER - BURRA VALLEY

LANDFORM	Rivers, creeklines and depressions		Rolling hills				
VEGETATION TYPE	Mountain Swamp Gum forest		Open forest – Red Stringybark and Long-leaf box (N and NW aspect). Tall wet forest – Robertson's Peppermint, Candlebark and Mountain Grey Gum (S and SE aspect and higher elevations)				
GEOLOGY & SOILS	Mainly granite, gneissic granite and gneiss. Also basalt. Light alluvial soils, sandy granite soils and red basalt soils.		Mainly granite, gneissic granite and gneiss. Also basalt. Light alluvial soils, sandy granite soils and red basalt soils.				
LOCATION EXAMPLE	Paddy's River		Bago State Forest
