

# SANDY - WANTIOOL CREEK

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

LANDFORM	River, Creeklines & Low country		Low hills & mid slopes	
VEGETATION TYPE	River Red Gum Forest		Yellow & White Box Woodland	
GEOLOGY & SOILS	Riverine deposits of clay, silt, sand & gravel. Brown & Grey Alluvial Soils		Granite, shale, quartzite & siltstone Red Earth & Red Podsollic Soils
