

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to [www.revegetation.org.au](http://www.revegetation.org.au)

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

## SAVERNAKE (SOUTH-WESTERN)

LANDFORM	Rivers, Floodplains and Levees		Plains		Rocky Outcrops	
VEGETATION TYPE	Riverine Forest.		Grey Box Woodland.		Rocky Outcrop Woodland.	
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.		Open grassy woodland with Grey Box and Bull Oak. Alluvial, variety of soils – clays, loams, sands and silts.		Low open woodland with exposed rock and sparse groundcover. Volcanic or metamorphic, granitic or metasedimentary coarse sands.	
LOCATION EXAMPLE	Murray River frontage, Cottadidda State Forest, Mulwala State Forest, Boomanoomana State Forest.		Savernake area, Fergusons Tank Travelling Stock Reserve, Wangamong Travelling Stock Reserve.		Mt Boomanoomah (metamorphic), The Boat Hill (volcanic).
