

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

TOOMA

LANDFORM	Creeks and low country		Lower slopes		Hill country	
VEGETATION TYPE	River Red Gum woodland		Blakely's Red Gum woodland		Red Stringybark dry sclerophyll forest (N-NW aspect). Broad-leaved Peppermint forest (SE aspect). Robertson's Peppermint, Candlebark, and Long-leaf Box forest (upper reaches).	
GEOLOGY & SOILS	Light alluvial soils		Granite and gneissic granite. Sandy granite soils.		Mainly granite and gneissic granite (Mt Maragle). Also quartzite (Mt Garland). Mainly sandy granite soils.	
LOCATION EXAMPLE	Tooma Creek at Tooma		Back Tooma – Tumbarumba road		Maragle Mountain
