

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

UPPER JERRA JERRA - UPPER BACK

LANDFORM	Hills	Flats and lower slopes	Hills
VEGETATION TYPE	White Box woodland and Red Stringybark dry forest	Blakely's Red Gum and Yellow Box woodland. Grey Box woodland.	Red Stringybark and Scribbly Gum/Snap Gum dry forest
GEOLOGY & SOILS	Granite, gneissic granite and gneiss. Sandy granite soils.	Mainly alluvium – sand, silt, gravel and clay. Red and yellow earths.	Quartzite, slate, phyllite, greywacke, hornfels and schist. Sandy yellow earths.
LOCATION EXAMPLE	Peddles Hill	Cookardinia and further south	Nest Hill
