

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

WAKOOL

LANDFORM	Rivers, Floodplains and Levees		Shallow Depressions		Creeklines and Secondary Floodplains	
VEGETATION TYPE	Riverine Forest.		Lignum – Goosefoot / Canegrass Swamp.		Black Box Woodland.	
GEOLOGY & SOILS	River Red Gum forest or woodland with understorey of herbs, sedges and grasses; includes weir pools and billabongs. Alluvial, heavy grey, brown or red clay soils.		Open scrub to tussock grassland in depressions and low lying areas subject to intermittent flooding. Alluvial, heavy grey, cracking clays, sometimes slightly saline.		Black Box woodland with often sparse understorey of grasses or shrubs. Alluvial, heavy brown or grey clays, self-mulching or compact.	
LOCATION EXAMPLE	Werai State Forest, Stevens Weir State Forest, Benjee State Forest.		Wakool River, Yallakool Creek, Jackson Weir on Eight Mile Creek.		Werai State Forest, Cobb Highway Travelling Stock Reserve north of Deniliquin, Cockran Creek near Rangemore Rd, Forest Creek on the Conargo Rd.
