

For guidance on planning your revegetation or restoration site (size, shape, species, density of planting) refer to chapters 4 and 5 of this guide, and head to www.revegetation.org.au

Remember: good quality vegetation sites may not need revegetation at all. Appropriate management can encourage natural regeneration.

YARRA YARRA

LANDFORM	Rocky outcrop, hill and mid-slope country		Flats and low country	Hill country	
VEGETATION TYPE	Dry sclerophyll forest – Red Box and Red Stringybark. Also Red Gum forest.		Blakely's Red Gum and Yellow Box woodland.	Dry sclerophyll forest – Red Box and Red Stringybark	
GEOLOGY & SOILS	Granite, gneissic granite and gneiss. Sandy granite soils.		Alluvium – sand, silt, gravel and clay. Sandy yellow earths.	Quartzite, slate, phyllite, greywacke, hornfels and schist. Shallow red and yellow loams.	
LOCATION EXAMPLE	Morgan's Ridge – western edge of catchment		Yarra Yarra Junction	Eastern edge of catchment
